

THE NEW B SERIES

DESIGNED FOR THE JOURNEY AHEAD

From your very first encounter, and throughout your musical journey, the Yamaha B Series will enrich your daily life for many years to come. Designed with a pure, clearly articulated sound and a natural, expansive resonance, the B Series captivates and inspires – encouraging you to play more and more. And as the natural materials of the piano mature, they develop a character that becomes ever more familiar, making the instrument feel uniquely yours.

To ensure enduring quality and performance, Yamaha oversees every stage of piano development in-house, from initial design through to final production. Every component, including the soundboard, frame, and action, is crafted to our uncompromising standards, delivering the exceptional quality for which Yamaha is renowned.
